

The Plockmatic SF 4000 Sheetfeeder

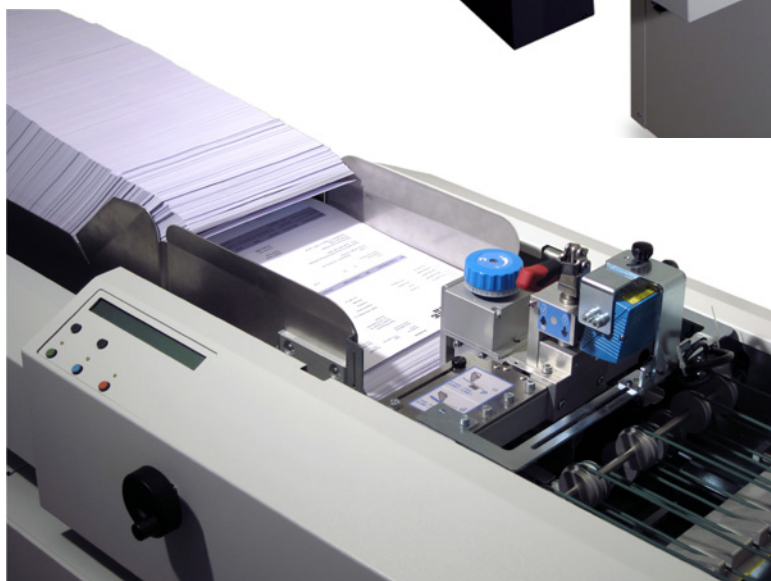

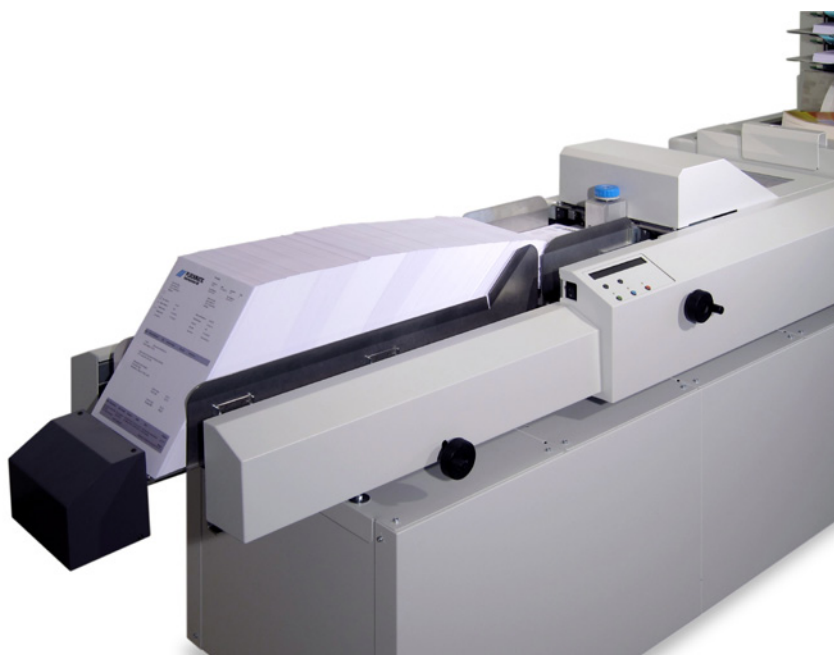

The SF 4000 Sheetfeeder is an extremely flexible high capacity feeder with OMR, barcode or 2D reading options. It turns the Plockmatic 4000 system into a powerful inserting system for invoices, statements and other documents requiring tracking and insertion verification. It feeds document sizes up to A4 (8.5x11") in both short edge first (SEF) or Long Edge First (LEF) into the 4000 system. Unique to this class, the 4000 system can insert these documents into either pocket or wallet style envelopes and securely seal them. The SF 4000 runs up to 21 000 sheets/h and the integrated loader module holds up to 4 000 sheets.

And yes – it can be loaded during the run.

PLOCKMATIC
Tomorrow's Finishing Today

The loader is an open design that makes it extremely easy to access and is fully enabled for loading on the run for non-stop inserting. The capacity is an impressive 4 000 sheets or approximately 400 mm (16"). Documents of up to A4 (8.5x11") size can be fed either portrait or landscape.

The Sheet Separator is within easy reach for job setup and adjustment on the fly. Shown is also the barcode reader. There are five different readers available that read OMR, barcode or 2D.

SF 4000 Sheet feeder

Speed	Max 21000 sheets/hour, landscape feed Max 15000 sheets/hour, portrait feed
Loading capacity	Up to 4000 sheets
